

UPDATE version 1.4.0

(only for version 1.3.1, If your version is 1.3.0 than please read Update 1.3.1)

Follow the steps bellow to update your template only if you have an earlier version (for example you have version 1.4.0)

STEP 1

IMPORTANT !!! First create a back-up of your current SYNERGY version!!!

STEP 2

Overwrite the “style.js” from the folder “css” into your own “css” folder.

IMPORTANT!!! If you have added new code into the style.css file than open your back-up file and add them again in the updated file.

STEP 3

Open the file “mc.modules.animation.js” from the folder “js” with any text editor:

1) Select all text from “**/* start ready function */**” (line 26) until the end(**/*----- end Utils Methods -----*/**) and delete it.

2) Open the NEW **mc.modules.animation.js** from v1_2_0 and select again the text from “**/* start ready function */**” until the end.

Copy the text and paste it in your current JS file(**1**).

Save the file(don't change the file name).

STEP 4

Open the file “**portfolio.html**” from the folder “html/portfolio/”(from version 1.3.1) with any text editor:

```
<div class="full-width-preview-media-holder" data-width="100%" data-height="390"></div>
<div class="full-width-preview-media-loader"></div>
<div id="preview-media-holder">
  <!--<div id="link" data-url="http://www.google.com" data-target="_blank"></div-->
  <div id="preview-media-image" data-url="assets/media/portfolio/images/image1.jpg" data-title="Custom Tit:
  <div id="video-wrapper" data-video-type="vimeo" data-width="640" data-height="390"
    data-url="http://player.vimeo.com/video/31423544?portrait=0&color=ffffff">
  </div>
  <div id="preview-media-image" data-url="assets/media/portfolio/images/image2.jpg" data-title="Custom Tit:
  <div id="video-wrapper" data-video-type="vimeo" data-width="640" data-height="390"
    data-url="http://player.vimeo.com/video/32487239?portrait=0&color=ffffff">
  </div>
```

Copy the highlighted text(from 1.4.0 portfolio.html file) **<div id="link"** data-url.... In your **portfolio.html**. Make sure you delete the image you want to replace with a link. At the end you need to have exactly x

number of thumbs and x number of description text and images (including external links)

STEP 5

Open the file “**image_gallery.html**” from the folder “html/galleries/”(from version 1.3.1) with any text editor:

```
<div id="module-galleries-preview">
  <div id="module-galleries-preview-background" class="opacity_9"></div>
  <div class="gallery-preview-media-loader"></div>
  <div id="preview-media-holder">
    <!--<div id="link" data-url="http://www.google.com" data-target="_blank"></div>-->
    <div id="preview-media-image" data-url="assets/media/galleries/image_gallery/images/image1.jpg" data-title="
      <div class="module-galleries-preview-description-text">1. Aliquam sed nibh congue ipsum lobortis ferment
    </div>
    <div id="preview-media-image" data-url="assets/media/galleries/image_gallery/images/image2.jpg" data-title="
      <div class="module-galleries-preview-description-text">2. Aliquam sed nibh congue ipsum lobortis ferment
    </div>
```

Copy the highlighted text(from 1.4.0 portfolio.html file) <div id="link" data-url.... In your **image_gallery.html**. Make sure you delete the image you want to replace with a link. At the end you need to have exactly x number of thumbs and x number of description text and images (including external links)

SOCIAL INTEGRATION

STEP 6

Open the file “**portfolio.html**” from the folder “html/portfolio/” (**from version 1.3.1**) with any text editor:

```
<div class="full-width-info-holder-desc">  
    <p>Giuseppe</p>  
    <div class="custom-separator"></div>  
    <span>Pellentesque diam lectus, dapibus non lacinia in, vulputate sit amet dolor. Vivamus sollicitudin  
    <span>Vivamus porta, mi non vestibulum semper, massa nisi commodo est, quis fermentum nisi risus  
    <div id="social-holder">  
        <div id="social-holder-back" class="opacity_2"></div>  
        <iframe src="//www.facebook.com/plugins/like.php?href=http%3A%2F%2Fthemes.mediareed.com%2F&#038;fref=ts">  
        <iframe allowtransparency="true" frameborder="0" scrolling="no" src="https://platform.twitter.com/widgets.js">  
        <a href="http://pinterest.com/pin/create/button/?url=http%3A%2F%2Fthemes.mediareed.com%2Fhtml">  
    </div>  
</div>  
<div class="full-width-info-holder-desc">  
    <p>Beat</p>  
    <div class="custom-separator"></div>
```

Copy the highlighted text(from 1.4.0 portfolio.html file)

<div id="social-holder">..... </div> In your **portfolio.html**.

This must be exactly after the ` Vivamus.... `

STEP 7

Open the file “**4_columns_projects.html**” from the folder “html/our_projects/”(from version 1.3.1) with any text editor:

```
<ul>
  <li>
    <div class="columns-preview-media" data-src="assets/media/our_projects/4_columns/images/image1.jpg"></div>
    <div class="columns-preview-description">
      <p>Giuseppe</p>
      <span>Etiam viverra, sem sit amet convallis posuere, ante velit congue dolor, vitae semper tortor dia
      <span>Sed sit amet leo sit amet nisl dignissim sagittis. Donec semper arcu augue. In eget erat nibh,
      <span>Suspendisse mollis feugiat consectetur. Suspendisse arcu nisl, vulputate ut laoreet ut, lacinia
    <div id="social-holder">
      <div id="social-holder-back" class="opacity_2"></div>
      <iframe src="//www.facebook.com/plugins/like.php?href=http%3A%2F%2Fthemes.mediacreed.com%2F%23por
      <iframe allowtransparency="true" frameborder="0" scrolling="no" src="https://platform.twitter.com/
      <a href="http://pinterest.com/pin/create/button/?url=http%3A%2F%2Fthemes.mediacreed.com%2Fhtml%2F
    </div>
  </li>
  <li>
    <div class="columns-preview-media" data-src="slides">
```

Copy the highlighted text(from 1.4.0 portfolio.html file)

```
<div id="social-holder">..... </div>
```

In your **4_columns_projects.html**. This must be exactly after the
 Suspendisse....

The same procedure for social applies to **3_columns_projects.html** and **2_columns_projects.html**

STEP 8

Open the file “**index.html**” from version 1.3.1) with any text editor:

```
</div><!-- end #menu-container -->
<div id="module-container">
</div>
</div>
<div id="load-container">
</div>
<div id="loading-animation">
  
</div>
<div id="footer-social-tooltip"></div>
<div id="console-log"></div>
<script type="text/javascript" src="//assets.pinterest.com/js/pinit.js"></script>
</body>
</html>
```

Copy the highlighted text(from 1.4.0 portfolio.html file)

`<script type="text/javascript" ...`

In your **index.html**. This must be exactly before the `</body>` closing tag.
