

UPDATE version 1.1.0

(only for version 1.0.2, If your version is 1.0.1 than please read Update 1.0.2)

Follow the steps bellow to update your template only if you have an earlier version (for example you have version 1.0.2)

STEP 1

IMPORTANT !!! First create a back-up your current SYNERGY version!!!

STEP 2

Open the file **“mc.modules.animation.js”** from the folder **“js”** with any text editor.

1) Select all text from **“/* start ready function */”** (line 26) until the end(**/*----- end Utils Methods -----*/**) and delete it.

2) Open the NEW **mc.modules.animation.js** from v1_1_0 and select again the text from **“/* start ready function */”** until the end.

Copy the text and paste it in your current JS file(**1**).

Save the file(don't change the file name).

STEP 3

Open the file “news.html” from the folder “html/news/” with any text editor and find the line that looks like this:

```
<div class="media-holder-news-preview" data-src="assets/media/news/images/image2.jpg">
  <div id="video-wrapper" data-video-type="vimeo" data-width="640" data-height="390"
    data-url="http://player.vimeo.com/video/31423544?portrait=0&color=ffffff">
    <!-- Touch Devices, in our case Ipad and Iphone don't work well with iframe's
      our submenu template has a higher index than the content but when using iframe the submenu
      can't be clicked anymore. So we use normal video as a backup.
      !!! This is only for Ipad and Iphone !!!
    -->
    <div id="video-wrapper" data-video-type="standalone" data-width="640" data-height="390"
      data-url1="http://video-js.zencoder.com/oceans-clip.mp4" data-type1="video/mp4"
      data-url2="http://video-js.zencoder.com/oceans-clip.webm" data-type2="video/webm"
      data-url3="http://video-js.zencoder.com/oceans-clip.ogv" data-type3="video/ogg"
      data-poster="js/video-js/oceans-clip.png">
    </div>
    <!-- END OF Ipad and Iphone fix-->
  </div>
</div>
```

Copy the line as you see above and paste it inside a preview image as you see above. Example:

We want news item 4 to have video preview, we go to the news preview 4 and we will paste the highlighted text (as above) inside:

```
<div class="media-holder-news-preview" data-src="assets/media/news/images/image4.jpg">

  <div id="video-wrapper" data-video-type="vimeo" data-width="640" data-height="390"
    data-url="http://player.vimeo.com/video/31423544?portrait=0&color=ffffff">
    <!-- Touch Devices, in our case Ipad and Iphone don't work well with iframe's
      our submenu template has a higher index than the content but when using iframe
      the submenu can't be clicked anymore. So we use normal video as a backup.
      !!! This is only for Ipad and Iphone !!!
    -->
    <div id="video-wrapper" data-video-type="standalone" data-width="640" data-height="390"
      data-url1="http://video-js.zencoder.com/oceans-clip.mp4" data-type1="video/mp4"
      data-url2="http://video-js.zencoder.com/oceans-clip.webm" data-type2="video/webm"
      data-url3="http://video-js.zencoder.com/oceans-clip.ogv" data-type3="video/ogg"
      data-poster="js/video-js/oceans-clip.png">
    </div>
    <!-- END OF Ipad and Iphone fix-->
  </div>

</div>
```

STEP 4

Open the file “4_columns_projects.html” from the folder “html/our_projects/” with any text editor:

Make sure that every thumb holder has:

```
<div class="play-gallery"></div>
```

Let's say we have thumb number 4 like this:

```
<div class="fourth-thumb-holder" data-id="animation">
  <div class="fourth-thumb-image">
    
    <div id="thumb-image-hover" class="hover-default">
      <div class="background opacity_6"></div>
      <div class="zoom-gallery"></div>
    </div>
  </div>
  <div class="thumb-tag">
    <h1>We are the - Beat</h1>
    <h2>animation / design</h2>
  </div>
</div>
```

Replace **zoom-gallery** with **play-gallery**

Now find the line that looks like this:

```
<div class="columns-preview-media" data-src="assets/media/our_projects/4_columns/images/image4.jpg">
  <div id="video-wrapper" data-video-type="vimeo" data-width="640" data-height="390"
    data-url="http://player.vimeo.com/video/31423544?portrait=0&color=ffffff">
    <!-- Touch Devices, in our case Ipad and Iphone don't work well with iframe's
    our submenu template has a higher index than the content but when using iframe the submenu
    can't be clicked anymore. So we use normal video as a backup.
    !!! This is only for Ipad and Iphone !!!
    -->
    <div id="video-wrapper" data-video-type="standalone" data-width="640" data-height="390"
      data-url1="http://video-js.zencoder.com/oceans-clip.mp4" data-type1="video/mp4"
      data-url2="http://video-js.zencoder.com/oceans-clip.webm" data-type2="video/webm"
      data-url3="http://video-js.zencoder.com/oceans-clip.ogv" data-type3="video/ogg"
      data-poster="js/video-js/oceans-clip.png">
    </div>
    <!-- END OF Ipad and Iphone fix-->
  </div>
</div>
```

Copy the line as you see above and paste it inside a preview image as you see above. Example:

We want news item 4 to have video preview, we go to the news preview 4 and we will paste the highlighted text (as above) inside:

```
<div class="columns-preview-media" data-src="assets/media/our_projects/4_columns/images/image4.jpg">

<div id="video-wrapper" data-video-type="vimeo" data-width="640" data-height="390"
  data-url="http://player.vimeo.com/video/31423544?portrait=0&color=ffffff">
  <!-- Touch Devices, in our case Ipad and Iphone don't work well with iframe's
    our submenu template has a higher index than the content but when using iframe
    the submenu can't be clicked anymore. So we use normal video as a backup.
    !!! This is only for Ipad and Iphone !!!
  -->
  <div id="video-wrapper" data-video-type="standalone" data-width="640" data-height="390"
    data-url1="http://video-js.zencoder.com/oceans-clip.mp4" data-type1="video/mp4"
    data-url2="http://video-js.zencoder.com/oceans-clip.webm" data-type2="video/webm"
    data-url3="http://video-js.zencoder.com/oceans-clip.ogv" data-type3="video/ogg"
    data-poster="js/video-js/oceans-clip.png">
  </div>
  <!-- END OF Ipad and Iphone fix-->
</div>

</div>
```

STEP 5

Repeat STEP 4 for the file “3_columns_projects.html” from the folder “html/our_projects/” with any text editor.

STEP 6

Repeat STEP 4 for the file “2_columns_projects.html” from the folder “html/our_projects/” with any text editor
