UPDATE version 1.0.2

Follow the steps bellow to update your template only if you have an earlier version (for example you have version 1.0.1)

STEP 1

IMPORTANT !!! First create a back-up of your current SYNERGY version

STEP 2

Open the file "mc.modules.animation.js" from the folder "js" with any text editor.

1) Select all text from **"/* start ready function */**" (line 26) until the end**(/*----------------- end Utils Methods --------------------*/**) and delete it.

2) Open the NEW **mc.modules.animation.js** from v1_0_2 and select again the text from **"/* start ready function */**" until the end.

Copy the text and paste it in your current JS file(**1)**).

Save the file(don't change the file name).

STEP 3

Update the file "mc.custom.list.js" from the folder "js/mediacreed/scrollbar/". Just overwrite the old one with this new one.

STEP 4

Update the file "style.css" from the folder "css". Just overwrite the old one with this new one.

STEP 5

Update the file "style.css" from the folder "css". Just overwrite the old one with this new one.

STEP 6

Open the file "contact.html" from the folder "html/contact/" with any text editor and find the line that looks like this:

```
<div id="map-holder" data-address="Oxford Circus, London, United Kingdom"
.......
```

Add the following line above the line you just found and now the code should look like this:

```
<!--<div id="media-holder-contact" data-src="assets/media/contact/contact_image.jpg"></div>-->
    <div id="map-holder" data-address="Oxford Circus, London, United Kingdom"
```

Now if you want to use an image instead of the Google Maps read the documentation regarding Contact.
